## **SAVE-T® PVC** **Cutting Services** *Die Cutting and Flash Cutting*

### Die Cutting

Custom die cutting is available for applications requiring large quantities of special size pieces. TMI has 5 die cutting machines including a fully automatic traveling head press, a beam press, a roller die, and 2 clicker dies. The automatic machines can handle pieces as large as 40" x 60" and can punch up to 600 cycles per hour. Quantities can vary. No minimums required. Call for details.

	Traveling Head	Beam Press	Roller Die	Clicker Die
<b>Max. Material Width</b>	74.5"	61"	48"	20"
<b>Max. Die Size</b>	23"x 23"	60"x 38"	48"x 72"	19"x 17"
<b>Tissue Interleaving</b>	Available	Available	N/A	N/A

### Flash Cutting

Flash cutting utilizes a pneumatic tool head that precisely cuts exact shapes based on a CAD drawing loaded onto its onboard computer. This machine makes it possible to quickly and accurately cut custom pieces with complicated angles and specifically located holes.

Using a master sheet or roll, we can cut custom sized pieces up to 60" wide and 116" long. The state-of-the-art flash cutting machine will nest the cut pieces in a way that minimizes scrap. It can cut PVC material from thicknesses of .004" to .250".

<b>Maximum Width</b>	60"
<b>Minimum Width</b>	3/8"
<b>Maximum Length</b>	116"
<b>Minimum Length</b>	3/8"
<b>Tolerance</b>	+/- 1/32"

### OTHER MATERIALS

TMI can Die Cut and Flash Cut other materials even if we don't sell it. Call us to see if we have the solution for you.
