SAVE-T® PVC

Rewinding Services

Interleaving, Dusting & Static Reduction

Tissue Interleaving

Tissue interleaving facilitates ease of handling when the material is pulled off the roll. 20 lb. paper is generally applied to full unconverted rolls, Tissue is applied while slitting or sheeting. Wider sizes can be special ordered. Call for details.

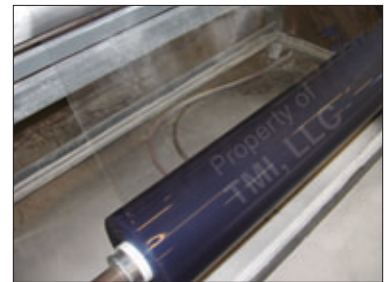

Max. Roll Width	Up to 80"
Max. Roll O.D.	18"
Min. Thickness	4 mil
Max. Thickness	.080"
Cores Sizes	2", 3", 6"

Electro-Static Dusting

A variable level of dusting can be applied to full rolls. This is an alternative to tissue interleaving. Dusting can be adjusted to meet your needs from light (level 1) to very heavy (level 10).

Max. Roll Width	Up to 76"
Max. Roll O.D.	18"
Min. Thickness	4 mil
Max. Thickness	.080"
Cores Sizes	2", 3", 6"

Static Reduction

The static charge inherent in the material can be temporarily reduced by utilizing a static elimination bar. This reduced static charge will help prevent dust contamination and static buildup that is present when unrolling the material. This service can be applied as rolls are being rewound for put up changes or while being converted. Maximum roll width . . . up to 76".
